DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 are drawn to compounds as set forth in formulas 3 and 7 of claim 1 below, classified in class 546, subclass 184.

- II. Claims 14-39 are drawn to processes and methods pertaining to formulas 3 and 7, classified in class 544, subclass 277.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. For example, groups I differs from group II because group I is directed to compound claims and group II is directed to processes and methods of making the compounds disclosed above as demonstrated by the classifications above. Applicant must pick an invention from the two groups above.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

A telephone call was made to Mark Buscher on September 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
